Network Automation 6.8.x
Layer 3 Network Model

Device
See Device Model.

DeviceRoute
Installed routing table entries per device.

InfraDevice
See Device Model.

RoutingAreaMember
Details individual routers' memberships in routing areas or autonomous systems.

RoutingArea
The OSPF routing areas as well as the BGP and EIGRP autonomous systems identified as running on or connected to the network.

SubnetMember
Devices and interfaces with IPs in a subnet.

Subnet
Connected routes found on the network.

ifArp
Entries for a given interface's ARP table.

Interface
See Device Model.

IprgMember
A device's individual entries in an IPRG, including VIP and state information.

Iprg
Contains IP Redundancy Groups, such as HSRP and VRRP groups.

PeerInterfaceID   DeviceID   PeerDeviceID

InterfaceID

DeviceRoutingProtoPeer
Peer information for EIGRP, BGP, and OSPF routing relationships.

Vlan
See Layer 1/2 Model.

ifAddr
IP addresses per interface.
